PROFESSIONAL SUMMARY

Aspiring Junior Backend Developer with a strong foundation in .NET Core and Python. Experienced in developing RESTful APIs, implementing database operations, and collaborating on payment systems applications. Currently pursuing a Computer Engineering degree with a focus on scalable backend architecture and API integration.

SKILLS

Technical Skills: ASP.NET Core Web API, FastAPI, Python, RESTful APIs, C#, .NET

Core Skills: API Testing, Database Design, Requirement Analysis, JWT Authentication, Object-Oriented Programming

Tools: Git, GitHub, Postman, Swagger, Docker

Databases: SQL Server, Azure SQL Database, SQL, SQLite, Supabase PostgreSQL, ChromaDB

Cloud: Azure SQL Database

Soft Skills: Teamwork, Communication, Problem-solving, Customer-oriented service

EXPERIENCE

Payment Systems Application Development Intern | VakıfBank | Istanbul, Turkey | Feb 2026 - Jun 2026

- Developed and maintained RESTful API endpoints using .NET Core.
- Authored SQL queries to support data analysis, validation, and backend operations.
- Performed API testing and request/response validation utilizing Postman.
- Collaborated with developers and analysts to translate business requirements into technical tasks.
- Gained professional exposure to enterprise-level payment systems workflows.

Sales Assistant | Inditex Zara | Istanbul, Turkey | Sep 2021 - Feb 2026

- Managed high-volume customer interactions in a fast-paced retail environment.
- Developed strong problem-solving and communication skills through collaborative teamwork.

PROJECTS

Restaurant POS System

Full-stack system for table, order, and payment management.

Technologies: ASP.NET Core, Supabase PostgreSQL, JWT

- Built backend business logic and RESTful APIs using ASP.NET Core Web API.
- Managed relational database operations and real-time updates via Supabase.
- Integrated JWT authentication for secure role-based access control.

Merchant Application System

API-driven merchant management system.

Technologies: ASP.NET Core, Entity Framework Core, Fluent Validation

- Developed RESTful APIs and implemented data access logic with Entity Framework Core.
- Integrated external services including Google Maps and currency exchange APIs.
- Implemented robust data integrity mechanisms using Fluent Validation.

EDUCATION

Nisantasi University | Bachelor of Computer Engineering | Computer Engineering | Sep 2023 - Jun 2026

Beykent University | Bachelor of Software Engineering | Software Engineering | Sep 2022 - Jun 2023

CERTIFICATIONS

- Advanced C# Language Features & Object-Oriented Programming | Microsoft
- Data Analytics | Google
- AI & ML Engineering | Microsoft
- Data Analytics Essentials | Cisco

LANGUAGES

- Turkish - Native
